

## REMARKS

The present application has been amended to overcome the Examiner's rejections and to clarify the patentable features of the invention.

In particular, claims 11, 12, 14, 16-21 have been canceled leaving claims 1-4, 7-10, 13 and 15 in the application. Claim 15, which was indicated allowable, has been amended to incorporate the subject matter of the base claim and, therefore, should be allowed. Claim 13 has been amended to include the subject matter of claims 11 and 12.

Corrected drawings accompany this response and approval of those drawings by the Examiner is respectfully requested.

Claims 1-4, 7-10 and 13 were subject to a double patenting rejection. On April 2, 2004, the undersigned left a voice mail with Primary Examiner Sara Clarke asking whether a Terminal Disclaimer would be sufficient to overcome this rejection. On April 4, 2004, the Examiner left the undersigned a voice mail confirming that a Terminal Disclaimer would overcome the double patenting rejection. The prompt response by the Examiner is acknowledged with appreciation.

In view of the above, the undersigned is supplying the required Terminal Disclaimer which should be sufficient to overcome the double patenting rejection. It should be noted here that in the Office Action the Examiner acknowledges that the subject application and the '753 patent, which was cited in the rejection, are commonly owned. Accordingly, it is believed that the submission of the Terminal Disclaimer should overcome the double patenting rejection, and that claims 1-4, 7-10 and 13 should be allowed. If additional documentation is required, it will be gladly furnished by the applicants.

In view of the foregoing amendment and discussion it is respectfully submitted that the claims in this application are patentably distinct from the prior art and each from

the other and this application is in condition for allowance. Prompt notice to that effect is earnestly requested.

Respectfully submitted,

Dated: June 1, 2004
